

A devastating duo with dual power is.... **Floxamin-OZ**TM

Ofloxacin 200mg. + Ornidazole 500mg. **TABLETS**

- * Displays broader antibacterial spectrum than either drug alone

Ofloxacin : Effective against aerobic bacterial infections

Ornidazole : Effective against anaerobic bacterial infections

- * Also extends benefit of built-in antiparasitic effect of ornidazole
- * Useful as an empirical treatment in traveller's diarrhoea
- * Better tolerated than combination with other nitroimidazoles

- No discolouration of urine
- No metallic taste

Indicated in :

- Complicated amoebic and giardial dysentery
- Complicated bacterial diarrhoea
- Pelvic inflammatory disease
- Prevention of infection during IUCD* insertion
- Complicated trichomonal vaginitis
- Presurgical prophylaxis

Also available :

Floxamin-OZTM
Suspension

Ofloxacin 50mg. + Ornidazole 125mg.

* IUCD : Intrauterine contraceptive device (like T tube etc.)
